

# The status of the components for M0

The situation on October 31<sup>st</sup>, 2024.

| TOTAL OF HV PCBs     | NECESSARY | PCBs WITH RESISTORS    | PCBs WITH RESISTIVE ELECTRODE & STICK | PCBs WITH GAS DISTRIBUTOR |
|----------------------|-----------|------------------------|---------------------------------------|---------------------------|
| 60                   | 80        | 80                     | 62                                    | 19                        |
| 100                  | 24        | 24                     | 1                                     | 2                         |
| 200                  | 48        | 48                     | 0                                     | 0                         |
| TOTAL OF SIGNAL PCBs | NECESSARY | PCBs READY TO ASSEMBLE |                                       |                           |
| 60                   | 60        | 30                     |                                       |                           |
| 100                  | 18        | 0                      |                                       |                           |
| 200                  | 36        | 0                      |                                       |                           |
| TOTAL OF HONEYCOMBS  | NECESSARY | CLEANED HONEYCOMBS     | HONEYCOMBS WITH SIGNAL PCB            |                           |
| 60                   | 40        | 20                     | 20                                    |                           |
| 100                  | 12        | 12                     | 0                                     |                           |
| 200                  | 24        | 24                     | 0                                     |                           |
| GAS DISTRIBUTORS     | NECESSARY | IN HOUSE               | ALREADY USED                          |                           |
| 60                   | 80        | 32                     | 38                                    |                           |
| 100                  | 24        | 25                     | 4                                     |                           |
| 200                  | 48        | 59                     | 0                                     |                           |

## RPC 56 mm

PCBs with gas distributor:

| PCB        | Number of PCBs |
|------------|----------------|
| Katod down | -              |
| Katod up   | 10             |
| Anod down  | 9              |
| Anod up    | -              |

PCBs with resistive electrode + stick:

| PCB        | Number of PCBs |
|------------|----------------|
| Katod down | 21             |
| Katod up   | 11             |
| Anod down  | 10             |
| Anod up    | 20             |

## RPC 96 mm

PCBs with gas distributor:

| PCB        | Number of PCBs |
|------------|----------------|
| Katod down | -              |
| Katod up   | 1              |
| Anod down  | 1              |
| Anod up    | -              |

PCBs with resistive electrode + stick:

| PCB        | Number of PCBs |
|------------|----------------|
| Katod down | -              |
| Katod up   | -              |
| Anod down  | -              |
| Anod up    | 1              |
